Claim 15 line 1 delete " 3" and insert –11—

2. The following is an examiner's statement of reasons for allowance: Prior art does not disclose filter inserted in series with speed control means in speed control loop, filter having frequency dependent phase lag characteristics divide into a high frequency domain, low frequency domain, and intermediate frequency domain between high frequency domain and low frequency domain and in which the gain FL in the low frequency domain is larger than gain KH in high frequency domain and in which the phase is delayed in the intermediate frequency domain; wherein speed control means includes a proportional controller for multiplying input by a proportional gain KP and outputting the result, as well as an integral controller for adding the value of input multiplied by the proportional gain KP, and the integral of the input multiplied by an

integral gain FI and outputting the result and filter setting are adjusted so that frequency the phase se of filter is delayed at frequency domain between the resonance frequency and the anti resonance, with respect to the rest of the claim .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
